# Introduction

Music is **a basic need of human survival.**

The music industry has undergone tremendous changes in relation to its production, distribution, and consumption habits due to the exponential development of new technologies, namely streaming platforms.

## **Problematical**

**What is the solution to the issue finding and audio quality of music.**

**What are the biggest challenges for music streaming services?**

**What alternatives do we have for music streaming**

# Theoretical Background

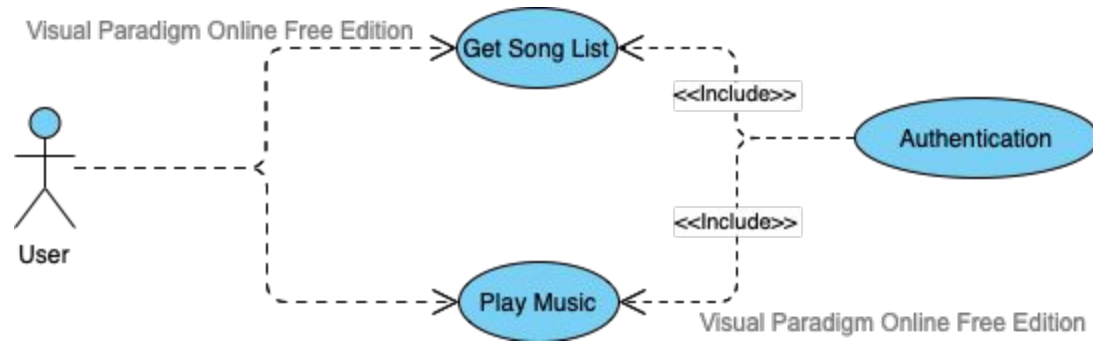

Functional Need :

The way we listen to music has changed considerably in the last few years. New concepts of digital music distribution have been established recently, e.g. Music as a Service (MaaS)
